Backend Developer, AI Prompt Engineer

Objective:

Seeking a Backend Developer / AI Prompt Engineer role where I can apply 4+ years of web development experience, backend architecture skills, and AI prompt engineering to build scalable, production-grade systems and improve product metrics.

Education:

Bachelor of Technology, Environmental Studies and Engineering — University of Uyo, 2020
B.Sc. Business Administration (ongoing) — BYU Pathway Worldwide, Salt Lake City, UT (2025 expected)

Experience:

LabourX — Backend (Remote) — 05/2023–Present

- Designed and implemented backend services and APIs for 10+ client projects using Laravel, PHP, Node.js, and PostgreSQL / MySQL, improving reliability and maintainability.
- Integrated AI-driven features and crafted high-impact prompts to automate content generation and support workflows, boosting user engagement metrics by up to 40%.
- Delivered scalable solutions for dashboards and eCommerce platforms; optimized endpoints and reduced average response times through query tuning and caching.
- Produced clean, documented code and CI-friendly deployments that streamlined handoffs and reduced bug rates.

Upwork — Software Developer & AI Prompt Developer (Remote / Freelance) — 08/2022–Present

- Architected end-to-end web applications, admin dashboards, and APIs for 15+ clients using Laravel, JavaScript, React, and Linux hosting stacks, achieving a 95%+ client satisfaction rate.
- Built secure, high-performance backend systems with PostgreSQL/MySQL, implemented authentication/authorization, and enforced best practices for input validation and error handling.
- Consistently delivered projects on time, with 30%+ repeat clients due to clear communication, thorough documentation, and production-ready deliverables.

Swisstronick — Blockchain Developer (Remote) — 03/2023–08/2023

- Developed private smart contracts and performed stress testing on blockchain networks; authored technical bounty-hunt articles to support community engagement.
- Contributed Solidity contracts and deployed testnets, validating security and performance tradeoffs for private-chain use cases.

Skills:

Laravel | PHP | Node.js | JavaScript | React | PostgreSQL | MySQL | Linux | Git | RESTful APIs | Solidity | Blockchain Development | AI Prompt Engineering | HTML | CSS | Tailwind CSS | Tailored Technical Writing

Certifications:

& Highlights:

- Web3 Development — Learnweb3.io (2023)
- Ethereum Bootcamp — Alchemy University (2023)
- Technical Writing — AptLearn.io (2023)
- Delivered backend implementations that improved user engagement by up to 40% and achieved 95%+ client satisfaction across freelance projects
- Strong English communication (written), experience producing client-facing documentation and technical articles

Languages:

English — Native
